

# THE HOUSING COOPERATIVE'S sorting chart

## COMBUSTIBLE WASTE

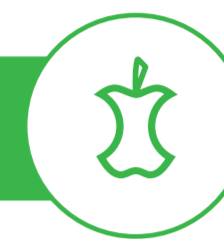

**Combustible waste is used to produce energy at the waste to energy plant**

### For example

- dirty carton packages and styrofoam
- plastic products, for example toys and buckets
- used hygiene products for example diapers and menstrual pads
- other non-recyclable, combustible waste
- eggshells

## BIOWASTE

### For example

- food leftovers and other foodstuff
- coffee grains, coffee filters and tea bags
- fruit and vegetable peels

## PAPER

**Taken to the housing cooperative's bin to a recycling point or to waste station**

- all paper that is delivered to the household through the mailbox

## PACKAGING WASTE Taken to the housing cooperative's bin, to a recycling point or to waste station

### CARTON PACKAGES

#### For example

- milk cartons and juice boxes
- cereal and cookie boxes
- cardboard packaging
- other carton packages

*To be recycled empty, clean and dry. Flatten the packages and pack them inside each other.*

### METAL PACKAGES

#### For example

- tin cans, caps and lids
- aluminum dishes and foils
- spray cans
- other small metal objects

*To be recycled empty, clean and dry.*

### GLASS PACKAGES

- glass jars and bottles

*To be recycled empty, clean and dry. Remove the caps and lids.*

### PLASTIC PACKAGES

#### For example

- plastic food packages, detergent packages
- plastic bags and wrappings
- plastic bottles, cans, canisters and jars
- styrofoam packages
- disposable plastic cups

*To be recycled empty. Caps and lids detached.*

*Recycling points are for household packaging waste. You can usually find them in the yard of supermarkets.*

**Take end-of-life textiles, large waste such as furniture and electronics and hazardous waste to a waste station**

**You can take all pharmaceutical waste to a pharmacy free of charge**
